# Lifeful place for lifeful people

Dal lavoro ibrido alla realtà in continua evoluzione: anche DVO si rinnova, rivelando una doppia anima. Un progetto nel progetto. Dal design dei servizi alla gestione completa di una commessa o di un intero progetto speciale.

Siamo una service company che risponde ad ogni idea creativa con prodotti sostenibili, un servizio just in time e una logistica affidabile, ma siamo anche partner di progetto, innovativo e versatile per professionisti e mondo corporate, fornendo un supporto completo in ogni fase del processo. Mettiamo al centro il benessere delle persone, perché questa è la vera evoluzione dello spazio lavoro.

La nostra impronta green, per il pianeta e per le future generazioni, passa anche attraverso l'utilizzo di materie prime rinnovabili, investimento continuo in certificazioni aziendali e di prodotto, controllo della qualità delle materie prime e dell'aria. Oggi siamo una duplice identità pronta a riscrivere le regole con un nuovo modello di business.

From hybrid work to constantly evolving reality: DVO renews itself, revealing a dual soul. A project within a project. From service design to the complete management of the global order or special project.

We are a service company that responds to every creative idea with sustainable products, a just-in-time service and reliable logistics, but we are also an innovative and versatile project partner for professionals and companies, providing comprehensive support at every stage of the process. We put people's well-being at the centre, because this is the true evolution of the workspace.

Our green thinking, for the planet and for future generations, goes also through the use of renewable raw materials, continuous investment in company and product certifications, quality control of raw materials and air. Today we are a twofold identity ready to rewrite the rules with a new model of business.

# Fluid design

Equilibrio | Essenza umana | Inclusività | Natura | Fluidità |  
Movimento | Design flessibile | Diversità | Benessere assoluto |  
Smart living | Talento interiore | Evoluzione

Lavoro agile, libertà di integrare vita e lavoro, equilibrio e talento interiore. Il nuovo ufficio abbraccia l'essenza umana, diventando uno spazio privo di confini, disegnato per il benessere assoluto. Il design flessibile spinge verso ambienti rilassanti, stimolando la creatività e riducendo lo stress.

L'innovazione digitale amplifica questo viaggio, consentendo la scelta del luogo e dell'orario di lavoro. La diversità diventa inclusività, una contaminazione culturale e un nomadismo positivo che arricchiscono le possibilità, disegnando strade verso nuove prospettive, luoghi e volti.

L'evoluzione dell'ufficio crea spazi ibridi in continuo movimento, plasmati per soddisfare le esigenze mutevoli e per incentivare il dialogo con gli altri. L'armonia e la rigenerazione emergono dal bilanciamento di un'esistenza consapevole: uno stile di vita intelligente che grazie alla tecnologia crea un equilibrio responsabile, una connessione e una fluidità positiva tra lavoro e natura.

Balance | Human essence | Inclusivity | Nature | Fluidity |  
Movement | Flexible design | Diversity | Absolute well-being |  
Smart living | Inner talent | Evolution

Agile working, freedom to integrate life and work, balance and inner talent. The new workplace embraces the human essence, becoming a boundless space designed for absolute well-being. The flexible design pushes towards relaxing environments, stimulating creativity and reducing stress.

Digital innovation amplifies this journey, allowing the choice of place and working time. Diversity becomes inclusivity, cultural contamination and positive nomadism enriching possibilities, drawing roads to new perspectives, places and faces.

The evolution of the office creates hybrid spaces in constant movement, shaped to meet changing needs and to encourage dialogue. Harmony and regeneration emerge from the balance of conscious living: a smart living to create a responsible balance, connections and positive fluidity between work and nature.

# Plants and Leaves Workstations

Green: una parola che, oltre a definire l'universo vegetale, rappresenta uno dei core concept di DVO. L'elemento naturale del verde, nelle sue infinite variazioni, scandisce il racconto del catalogo Workstations.

Green: a word which, as well as defining the world of plants, represents one of DVO's fundamental concepts. The natural element of green, in its infinite variations, punctuates the narrative of the Workstations catalogue.

# E-PLACE

DV804

Il futuro del lavoro abbraccia un approccio ibrido e intelligente che pone al centro l'individuo. I tavoli DV804-E-Place interpretano questa nuova tendenza e sono progettati sia per un uso temporaneo che continuativo. L'utilizzatore può accedere, in modo facile e veloce, alle opzioni per l'alimentazione e dati, mentre gli schermi assicurano una privacy acustica e visiva per tutte le attività che richiedono concentrazione. Il design moderno della struttura metallica a cavalletto si svincola dal concetto di gambe con posizione prestabilita: il sistema consente di riposizionarle a piacimento, anche dopo l'installazione. I tavoli sono realizzati con materiali durevoli e di qualità certificata, a vantaggio della sostenibilità. Accessori ed elementi aggiuntivi quali portalampade, screen o bracci per monitor si possono posizionare liberamente. Una specifica canalina verticale, calamitata alle gambe, consente di celare i cavi elettrici. I tavoli DV804-E-Place promuovono la collaborazione spontanea, trasformando l'ufficio in un luogo funzionale e dinamico.

The future of work embraces a hybrid and intelligent approach that places the person at the centre. The DV804-E-Place tables interpret this new trend and are designed for both temporary and continuous use. The user can access power and data options quickly and easily, while screens provide acoustic and visual privacy for all activities requiring concentration. The modern design of the metal trestle structure breaks away from the concept of legs with a predetermined position: the system allows them to be repositioned at will, even after installation. The tables are made of durable, quality-certified materials for the benefit of sustainability. Accessories and additional elements such as lamp holders, screens or monitor arms can be freely installed. A special vertical cable duct, magnetised to the legs, allows electrical cables to be hidden. The workstations DV804-E-Place promote spontaneous collaboration, transforming the office into a functional and dynamic place.

# ENTITY

## DV801

Un nuovo modo di pensare lo spazio lavorativo. Attuale nei concetti ergonomici della postazione di lavoro, la scrivania DV801-Entity è destinata sia ad uffici operativi che direzionali, promuovendo un ambiente efficiente ed ottimizzato.

Rappresenta la soluzione ideale per chi desidera sfruttare al meglio i propri spazi attraverso composizioni modulari che includono scrivanie in linea, postazioni condivise o tavoli meeting. La scrivania DV801-Entity si caratterizza per la particolare struttura a ponte a sezione triangolare, impreziosita alle estremità da dettagli in ABS ad effetto cromato che conferiscono alla scrivania un aspetto elegante e ricercato. La struttura è disponibile in un'ampia scelta di colori e misure che consentono di configurare tavoli modulari di grandi dimensioni. La collezione è completata da un'ampia gamma di accessori, screens e diverse tipologie di top access per una funzionalità ottimale della workstation.

A new way of conceiving the workspace. Contemporary in its ergonomic workplace concepts, the DV801-Entity desk is intended for both operative and executive office, promoting an efficient and optimised environment. It is the ideal solution for those who wish to optimise their space through modular compositions that include in-line desks, shared workstations or meeting tables. The DV801-Entity desk is characterised by the distinctive triangular section of the bridge structure, enhanced at the ends by chrome-effect ABS details that give the desk an elegant and refined look. The structure is available in a wide choice of colours and sizes which allow large modular tables to be configured. The collection is completed with a wide range of accessories, screens and different top access elements for optimal workstation functionality.

# ENNA

DV812

Riscoprire il piacere di lavorare in un ambiente flessibile e confortevole, rappresenta il vero futuro e l'innovazione del lavoro ibrido.

La collezione operativa DV812-Enna è l'emblema di questo nuovo modo di concepire l'ufficio, non più confinato, ma esteso ad altri ambienti grazie alla proposta di diverse tipologie di tavoli, forme ed una ampia palette di finiture.

La scrivania si caratterizza da un piano di lavoro a forte spessore (38 mm) e dalla struttura formata unicamente da 4 gambe in metallo colorato disponibili anche in versione con ruote frenate. Una specifica canalina verticale, calamitata alle gambe, consente di celare i cavi elettrici. I tavoli su ruote e i tavoli alti (H 107 cm) promuovono nuovi metodi di lavoro dinamici.

La serie è stata sviluppata per soddisfare al meglio le esigenze di mercato grazie alla semplicità dei componenti e alla velocità di montaggio. Il design moderno e funzionale si adatta alle mutevoli esigenze dell'ufficio, garantendo un ambiente di lavoro ergonomico e confortevole.

Rediscovering the pleasure of working in a flexible and comfortable environment represents the real future and innovation of hybrid work.

The DV812-Enna workstation is the symbol of this new way of conceiving the office, no longer confined, but extended to other environments thanks to the proposal of different types of tables, shapes and a wide palette of finishes.

The desk is characterised by a thick worktop (38 mm) and a structure consisting solely of 4 coloured metal legs that are also available in a version with braked castors.

A special vertical cable duct, magnetised to the legs, allows electrical cables to be hidden. Tables on castors and high tables (H 107 cm) promote dynamic working methods. The series has been developed to best meet the needs of the market thanks to the simplicity of its components and its easy assembly. The modern and functional design adapts to office changing requirements, ensuring an ergonomic and comfortable working environment.

# PAG

DV802 W | DV802 A  
DV802 U | DV802 O

L'ufficio si libera da ogni vincolo, sociale e strutturale. Diventa un concetto aperto, fisicamente e idealmente. Il sistema di scrivanie DV802-Pag è lo strumento modulare e informale per organizzare e vivere in modo nuovo lo spazio ufficio. Rappresenta la soluzione ideale per chi desidera sfruttare al meglio gli spazi attraverso composizioni modulari che includono scrivanie in linea, postazioni condivise, tavoli meeting e tavoli alti. La scrivania è disponibile con 3 tipi di strutture che ne definiscono l'estetica: gamba a ponte, gamba chiusa e gamba a cavalletto; mentre i materiali impiegati, metallo o legno, suggeriscono contemporaneità o calore domestico. I piani dei bench sono disponibili in tre versioni: piani unici con asole e top access integrati, con uno spazio centrale tra i due piani per accedere facilmente ai collegamenti elettrici e una versione con binario centrale a cui si possono integrare gli accessori e riposizionarli in base alla necessità. Per una privacy individuale, possono essere installati dei pannelli in melaminico, in vetro oppure fonoassorbenti in poliestere termoformato. Versatili nel design, le scrivanie DV802-Pag si prestano a molteplici stili di lavoro sia agili che convenzionali.

The office is freed from all constraints, social and structural. It becomes an open concept, physically and ideally. The DV802-Pag desk system is the modular and informal tool to organize and experience office space in a new way. It is the ideal solution for those who want to make the most of space through modular compositions that include in-line desks, shared workstations, meeting tables and high tables. The desk is available with 3 types of structures that define its aesthetics: bridge leg, loop leg and trestle leg and the materials used, metal or wood, suggest contemporaneity or domestic warmth. The desktops of the shared workstations are available in three versions: one-piece tops with slots and top access, with a central space between the two tops for easy access to electrical connections, and a version with a central rail to which accessories can be integrated and repositioned as required. For individual privacy, melamine, glass or sound-absorbing thermoformed polyester panels can be installed. Versatile in design, the DV802-Pag desks are suitable to a variety of work styles, both agile and conventional.

# NOBU

## DV803

Il mondo del lavoro è in costante evoluzione, una rivoluzione in cui il benessere dell'individuo è al centro del cambiamento. In questo scenario l'ufficio si trasforma e la scrivania DV803-Nobu si adatta ad un nuovo modo di concepire il lavoro. DV803-Nobu è un sistema di scrivanie caratterizzato da 4 tipologie di struttura: ad altezza fissa (H 74 cm), regolabile in altezza tramite pulsante (H 65÷86 cm), a manovella (H 65÷112 cm), e su ruote con piano ribaltabile. La struttura metallica è composta da due gambe a "T" rovesciata e da una trave telescopica che accoglie orizzontalmente i cavi. I tavoli folding sono dotati di ruote frenate, agganciabili tra loro e integrati di un sistema che consente al piano di ruotare e di chiudersi per occupare il minor spazio possibile. La linea minimale della scrivania DV803-Nobu ridisegna l'estetica dello spazio, senza rinunciare all'ergonomia e al benessere. I materiali utilizzati sono riciclabili e i tavoli sono facilmente disassemblabili per un corretto riciclaggio al termine della loro vita.

The world of work is constantly evolving, a revolution in which the well-being of the individual is at the centre of change. In this scenario, the office is transformed and the DV803-Nobu desk adapts to a new way of conceiving work. The DV803-Nobu is a desk system characterised by 4 types of structure: fixed height (H 74 cm), height-adjustable by push-button (H 65÷86 cm), crank-mounted (H 65÷112 cm), and on castors with a tilting top. The metal structure consists of two inverted 'T' legs and a telescopic beam that holds the cables horizontally. The folding tables are equipped with braked castors, hook together and are provided of a system that allows the desktop to swivel and fold to occupy as little space as possible. The minimalist design of the DV803-Nobu desk redefines the aesthetics of the space without sacrificing ergonomics and well-being. The materials used are recyclable and the desks are easily disassembled for proper end-of-life recycling.

# TOLEDO

DV818

Molto più di una semplice scrivania, DV818-Toledo è l'espressione tangibile di una nuova visione lavorativa flessibile che preserva il benessere della persona. Un sistema di tavoli regolabili in altezza elettricamente che unisce funzionalità, comfort ed ergonomia.

La scrivania DV818-Toledo può essere regolata in altezza autonomamente H 64,5÷130 cm, mentre il bench H 61,5÷127,5 cm. Tastierino dotato di 4 memorie per la regolazione dell'altezza del piano di lavoro. La regolazione in altezza a 3 stadi, rapida e silenziosa, consente di alternare facilmente la postura seduta a quella eretta, adattando la tecnologia alle esigenze fisiche individuali.

La trave è telescopica e canalizzabile.

Il sistema di gestione dei cavi (disponibile in diverse soluzioni) garantisce un risultato preciso e ordinato. Le scrivanie possono essere integrate con pannelli fonoassorbenti in poliestere termoformato o melaminico, garantendo una privacy individuale. Con il suo design e l'ampia scelta di finiture, si adatta in modo intelligente alle esigenze della persona, abbracciando benessere ed innovazione.

Much more than a simple desk, the DV818-Toledo is the tangible expression of a new vision of flexible working that preserves personal well-being. An electrical height-adjustable desk that combines functionality, comfort and ergonomics.

The DV818-Toledo desk can be adjusted in height independently H 64.5÷130 cm while the bench H 61.5÷127.5 cm. Control pad with 4 memories for height adjustable worktop. The quick and silent 3-stage height adjustment allows easy switching between sitting and standing positions, adapting the technology to individual physical needs.

The beam is telescopic and can be ducted with cables. The cable management system (available in several versions) offers a neat and tidy look. The desks can be completed with sound-absorbing panels in thermoformed polyester or melamine, ensuring individual privacy. With its design and wide choice of finishes, it adapts to people's needs in an ingenious way, embracing wellness and innovation.

# TREKO

DV805

Praticità e flessibilità, sono i plus che consentono di arredare i moderni spazi di lavoro. L'ufficio diventa un luogo da ripensare tra funzionalità ed ergonomia, un ambiente che incentivi la produttività.

Le linee pulite e senza tempo della scrivania pannellata operativa DV805-Treko si integrano perfettamente in questo contesto. Una scrivania dal design classico e basilare, adatta a gestire razionalmente i diversi spazi di lavoro.

Grazie alle molteplici combinazioni tra finiture e dimensioni, le scrivanie DV805-Treko rispondono ai bisogni essenziali dei nuovi layout progettuali. I tavoli sono realizzati con materiali durevoli e di qualità certificata, a vantaggio della sostenibilità. Ideale per ambienti openspace, le scrivanie possono essere integrate di frontal panel fonoassorbenti in poliestere termoformato o in melaminico, che garantiscono una privacy individuale.

Practicality and flexibility are the plus points of modern workspaces. The office becomes a place to rethink between functionality and ergonomics, an environment that encourages productivity. The clean, timeless lines of the DV805-Treko operative panelled desk fit perfectly into this context. A desk with a classic and simple design, adapted to rationally manage different work environments. Thanks to the multiple combinations of finishes and sizes, the DV805-Treko workstations meet the essential needs of new design layouts. The desks are made of durable, quality-certified materials for the benefit of sustainability. Ideal for openspace environments, the desks can be equipped with sound-absorbing screens in thermoformed polyester or melamine, that provide individual privacy.

# OSLO

DV817

Semplicità ed essenzialità, con un design incisivo e riconoscibile, rendono la scrivania DV817-Oslo adatta a qualsiasi spazio di lavoro. La struttura metallica è composta da due gambe a "T" rovesciata a sezione rotonda e da una trave in metallo ad innesto rapido senza uso di viti. La gamba presenta alla base 2 piedini rotondi in ABS colorato che connotano stilisticamente il prodotto in abbinamento al colore della gamba oppure a contrasto. La struttura dei bench dispone di gambe intermedie condivise che grazie alla loro dimensione e forma non recano intralcio all'operatore. Una specifica canalina verticale calamitata alle gambe consente di celare i cavi. DV817-Oslo propone soluzioni trasversali di tavoli alti e tavolini caffè che consentono di progettare aree break e spazi collaborativi, per dare un maggiore comfort all'ufficio contemporaneo. I materiali utilizzati sono riciclabili e i tavoli facilmente disassemblabili per consentirne il corretto riciclaggio al termine della loro vita.

Simplicity and essentiality, with an incisive and recognisable design, make the DV817-Oslo desk suitable for any workspace. The metal structure is made up of two inverted 'T'-shaped legs with a round cross-section, and a screwless metal beam. The leg has 2 round coloured ABS feet at the base, which stylistically characterise the product either matched to the colour of the leg or in contrast. The structure of the benches has shared intermediate legs, which, due to their size and shape, do not hinder the operator. A specific vertical channel magnetised to the legs hides the cables. DV817-Oslo offers versatile solutions of high tables and coffee tables that design break areas and collaborative spaces to add comfort to the contemporary office. The materials used are recyclable and the tables are easily disassembled to allow for proper recycling at the end of their life.

# NIDA

DV816

Il lavoro ibrido e smart emerge come il futuro del quotidiano lavorativo, con l'individuo al centro di questa trasformazione. In questa nuova era, il concetto tradizionale di ufficio lascia spazio a luoghi di lavoro sempre più eterogenei.

Il tavolo DV816-Nida, concepito sia per l'home office che per ambienti di formazione, si adatta a questa trasformazione grazie alle sue dimensioni compatte e alla facilità di assemblaggio. La struttura è costituita da una gamba in tubolare metallico disponibile in diverse finiture, mentre il piano di lavoro è sagomato con spigoli arrotondati. In opzione, si possono aggiungere due carter frontali in metallo, uniti tra loro mediante un cordoncino elastico, con funzione di contenere i cablaggi e assicurare maggiore privacy. Accessori quali piccole mensole e cassetto, personalizzano lo scrittoio. DV816-Nida unisce estetica e benessere fisico, creando un ambiente di lavoro libero da schemi progettuali.

Hybrid and smart work are emerging as the future of everyday work, with people at the centre of this transformation. In this new era, the traditional office concept gives way to increasingly heterogeneous workplaces. The DV816-Nida table, designed for home office and for training environments, adapts to this transformation thanks to its compact dimensions and easy assembly. The structure consists of a tubular metal leg available in different finishes, and the worktop is shaped with rounded edges. Optionally, two metal front covers can be added, joined together by an elastic cord, to contain wiring and provide greater privacy. Accessories such as small shelves and a drawer customise the desk. The DV816-Nida combines aesthetics and physical well-being, creating a working environment free of design schemes.

# SHELL SYSTEM

DV650

La collezione DV650-Shell è un sistema di arredo multifunzionale che ridefinisce l'ambiente di lavoro e rappresenta un safe space all'interno dell'openspace.

Il sistema si sviluppa partendo dal concetto di privacy della tradizionale paretina disposta intorno alla scrivania sino ad arrivare alla progettazione di piccoli "Pod", includendo un sistema di sedute componibili pensate per le aree collaborative.

Il denominatore comune è l'importanza posta sulla privacy, sulla comunicazione e sul benessere psicofisico della persona.

In base alla configurazione scelta, i Pod possono fungere da stanze per video-conferenze, zone di relax o multifunzione.

I Pod sono versatili e facili da installare, senza dover effettuare ulteriori lavori all'edificio.

La struttura è costituita da pannelli in melaminico sp. 25 mm con una texture materica ad effetto "tessuto" per una gradevole sensazione tattile e visiva, e bordi perimetrali in ABS. Per un maggiore comfort e insonorizzazione acustica, in opzione, sono disponibili delle lastre di poliestere termoformato da applicare sulle pareti interne dei Pod.

The DV650-Shell collection is a multifunctional furniture system that redefines the working environment and represents a safe space within the open space.

The system develops from the privacy concept of the traditional partition around the desk to the design of small 'pods', including a modular seating block system designed for collaborative areas.

The common denominator is the importance placed on privacy, communication and the psycho-physical well-being of the individual. Depending on the configuration chosen, the Pods can serve as video-conference rooms, breakout zones or multifunctional areas.

The Office Pod are versatile and easy to install, without having to carry out any additional work on the building.

The structure consists of 25 mm thick melamine panels with a textured 'fabric' effect for a pleasant tactile and visual sensation, and ABS perimeter edges. For added comfort and acoustic soundproofing, there are optional thermoformed polyester sheets to be applied to the interior sides of the Pods.

# E-MEDIA

DV401

L'evoluzione delle tecnologie sta trasformando il modo di lavorare e gli ambienti della nostra vita professionale, facendoli diventare luoghi confortevoli in cui le persone possono incontrarsi e collaborare pur essendo fisicamente distanti. DV401-E-Media è un tavolo riunione multifunzione, progettato per riunioni in presenza o virtuali, sia seduti che in piedi e proposto in due altezze (H. 174 e H. 207 cm). Il fusto portante in melaminico può contenere, al suo interno, i cablaggi che accedono dalla parte inferiore attraverso i tappi passacavi diametro 80 mm. Il vano è ispezionabile mediante l'apertura del pannello superiore sottopiano. Il piano è in melaminico sp. 25 mm, sagomato a forma trapezoidale per consentire a tutti una corretta visione del monitor. È disponibile in due lunghezze (L.142 e L.202 cm) ed è fornito di top access centrale con apertura a slitta. In fase di montaggio è possibile scegliere, tra 2 altezze predefinite. DV401-E-Media unisce funzionalità e tecnologia, creando un ambiente di lavoro sempre più interconnesso.

The evolution of technology is transforming the way we work and the environments of our professional lives, making them become comfortable places where people can meet and collaborate despite being physically distant. The DV401-E-Media is a multifunctional meeting table, available in two heights (H. 174 and H. 207 cm), designed for in-person or virtual meetings, either seated or standing. The melamine supporting frame can contain, inside, the wiring which can be accessed through the 80 mm diameter grommets installed at the base. Inspection inside of the vertical column is possible through the opening of the panel under the tabletop. The top is made of 25 mm thick melamine, shaped in a trapezoidal shape to allow everyone a correct view of the monitor. It is available in two lengths (L.142 and L.202 cm) and is equipped with a central top access with slide opening. During assembly it is possible to choose the position of the monitor bracket between 2 predefined heights. DV401-E-Media combines functionality and technology, creating an increasingly interconnected working environment.

# MOBILE WALL

DV420

In ogni ufficio le persone interagiscono attraverso la tecnologia e collaborano, con arredi multifunzionali, in ambienti che possono essere reali o virtuali, destinati a piccole o grandi riunioni, in luoghi aperti o chiusi. DV420-Mobile Wall è un carrello portamonitor, autoportante, su ruote con freno, progettato per fungere anche come elemento divisorio degli spazi. Rappresenta il simbolo del lavorare in modo flessibile, definendo nuovi layout, ottimizzando e riconfigurando gli spazi in luoghi di formazione o meeting room. La struttura in metallo verniciato è disponibile in H 180 e L 120 cm, ed entrambi i lati possono essere personalizzati con supporti per monitor o lavagne.

È dotata di 2 ripiani centrali fissi e due pratici contenitori metallici posti alle estremità. Ai fianchi, è possibile applicare alcuni accessori quali mensole, portapenne o ganci appendiabiti. Una specifica canalina verticale, calamitata alla struttura, consente di celare i cavi elettrici. Grazie alla sua flessibilità, DV420-Mobile Wall è in perfetta sintonia con i requisiti mutevoli del mondo del lavoro moderno.

In every office, people interact through technology and collaborate, with multifunctional furniture, in environments that can be real or virtual, for small or large meetings, in open or enclosed spaces.

The DV420-Mobile Wall is a free-standing monitor trolley, on castors with brakes, designed to also function as a space divider. It represents the symbol of flexible working, defining new layouts, optimising and reconfiguring spaces in training or meeting rooms.

The painted metal frame is available in H 180 and W 120 cm, and both sides can be customised with supports for monitors or whiteboards.

It is equipped with 2 fixed central shelves and two practical metal containers.

Some accessories such as shelves, pen holders or clothes hooks can be attached to the sides.

A special vertical cable duct, magnetised to the structure, allows the hiding of electrical cables.

Thanks to its flexibility, the DV420-Mobile Wall is perfectly adapted to the changing requirements of the modern working world.

La natura è il motore che sostiene il mondo in cui viviamo. Lavorare in un'ottica green è un impegno e un dovere per avere i piedi radicati a terra nel presente, ma lo sguardo sempre rivolto al futuro.

Per il benessere del domani è indispensabile fare oggi delle scelte sostenibili. Selezioniamo con grande attenzione la qualità dei materiali dei nostri prodotti e soddisfiamo gli standard più rigorosi: prodotti durevoli e sostenibili. Una costante ricerca per un miglioramento continuo nei processi produttivi di ogni nostra attività: essere green è la nostra natura, non solo parole.

Ecco i fatti: le nostre certificazioni aziendali e di prodotto, sono in costante aggiornamento, poiché essere green vuol dire soprattutto sapersi sempre rinnovare per crescere.

Nature is the engine that sustains the world we live in. Working in a green perspective is a commitment and a duty to have one's feet firmly rooted in the present, but one's gaze always turned towards the future.

For the well-being of tomorrow, it is essential to make sustainable choices today. We carefully select the quality of the materials in our products and meet the strictest standards: durable and sustainable products. Constant research for continuous improvement in the production processes of all our activities: being green is our nature, not just words.

Here are the facts: our company and product certifications are constantly being updated, because being green means above all always knowing how to renew in order to grow.
